Applicant – Master's Degree in Cybersecurity, University of Padua (A.Y. 2027/28)

SUMMARY

Final-year Information Technology student with a hands-on focus on offensive security. 1st place in a CTF competition, halfway through the Hack The Box CPTS path, and builder of red-team / blue-team tools, including an AI-driven platform. Combines a computing foundation with a business view of security risk.

EDUCATION

Tunis Business School Sept. 2023 – June 2027 (expected)
Bachelor in Business Administration – Information Technology major, Business Analytics minor Tunis, Tunisia

- **Computing:** Algorithms and Programming, Object-Oriented Programming, Database Design and Management, Networking Fundamentals, System Administration (Linux), Web Services, Information Assurance and Security, Artificial Intelligence.
- **Mathematics:** Linear Algebra, Business Optimization, Probability and Statistics.
- **In progress:** Machine Learning, Cloud Computing. **GPA, last three semesters:** 3.04/4.0.
- **Final-year project (PFE):** 6-month offensive-security internship starting Jan./Feb. 2027; supervisor: Prof. Manel Abdelkader, Head of the IT Department.

Lycée Pilote Bourguiba Tunis – Baccalauréat in Mathematics, **Mention Très Bien** (national competitive entry) June 2023

EXPERIENCE

Sagemcom August 2026
Mobile Application Developer Intern Ezzahra, Tunisia

- Migrated an internal factory-floor tool from a shared-workstation web app to a React Native (Expo) mobile app, designing per-user authentication (Django REST Framework + JWT) for about 66 users to replace an unauthenticated shared login.
- Implemented defense-in-depth controls: rotating/blacklisted refresh tokens (replay protection), rate-limited login (brute-force protection), OS-backed token storage (iOS Keychain / Android Keystore), enforced HTTPS. **Received a written recommendation letter.**

El Mazraa July – August 2025
IT Intern Nabeul, Tunisia

- Troubleshot network and hardware issues with the IT team, gaining hands-on experience with network configuration.

SECURITY PROJECTS

HARIS – AI Security Platform | *FastAPI, React, Neo4j, Docker – team project, 2nd place, AI × Cybersecurity track*

- AI agent that simulates red-team attacks and learns to detect them to support SOC teams; microservice architecture with a Neo4j graph database (vector index) to generate attacks, evaluate detections and keep auditable forensic traces.

Ransomware Simulator | *Python, Flask – team project*

- Full ransomware kill-chain simulator: AES-256-CBC hybrid encryption, RSA-2048-OAEP key wrapping and a Flask HTTPS command-and-control server; TTPs mapped to MITRE ATT&CK, run only in an air-gapped VirtualBox lab.

HashRecon | *Python*

- CLI tool that identifies password-hash algorithms and recovers plaintext via dictionary attack, showing the weakness of fast, unsalted hashes (MD5, SHA-1) versus bcrypt / Argon2; includes authorized-use warnings.

PortRecon | *Python*

- Concurrent TCP connect scanner with banner grabbing; classifies port states from OS-level connection outcomes.

MyVet | *Flask, JWT, React*

- API-first web platform with JWT authentication, mandatory TOTP two-factor authentication and role-based access control.

CERTIFICATIONS & TRAINING

- **Penetration Testing (CPTS path)** – Hack The Box Academy *In progress (halfway)*
- **Learn Hacking Using the Cloud From Scratch** – zSecurity *August 2026*

AWARDS & LEADERSHIP

- **CyberHorizon Hackathon** (Hammamet, April 2026): **1st place** in the CTF and **2nd place** in the AI × Cybersecurity track.
- **President, Art Factory – TBS** (2024–2025): led a 60-member club and organized "TBS Got Talent", a major campus event.
- **Global Volunteer, AIESEC** (Istanbul, summer 2024): taught English to youth in an international volunteer team.

SKILLS

Offensive security	Burp Suite, gobuster, Hydra, Kali Linux, Empire, BeEF; Hack The Box, TryHackMe, CTF
Programming	Python, C, Java, Kotlin, JavaScript, SQL, Shell
Dev & infra	FastAPI, Flask, Django REST Framework, JWT, React, React Native (Expo), Neo4j, SQLite, Docker, nginx, Git, VirtualBox
Languages	English (fluent – TOEFL iBT 2026), French (fluent – TCF 2026), Arabic (fluent), German and Korean (beginner)
